ENERGY METER LC10 | LC30

**ZAM LCXX** series is a series of Energy meters that measures important electrical parameters in 3 phase and single phase network. It measures electrical parameters like Active / Reactive / Apparent energy , power as per models. The instrument has 2 configurable optional outputs as pulse output for energy measurement or limit output for control & indication purpose.

### Product Features

- **True RMS measurement** : Measures distorted waveform up to 15th Harmonic
- **Energy as per IEC 62053** :
  - Independent Import and Export Energy counter. Active energy (kWh), Reactive energy (kVArh), Apparent energy (kVAh) measurement
  - Accuracy as per IEC 62053-21, IEC62053-23
- **THD Measurement** : The instrument measures THD per phase voltage & current up to 15th Harmonic
- **On-site programmable** :
  - On-site Programmable System Configuration 3PH4W / 3PH3W / 1PH2W.
  - On-site Programmable CT ratios and PT ratios
- **Direct remote access (Optional)** :
  - Remote configuration of the Instrument via MODBUS
  - Remote access of measured parameters. Programmable baud rates up to 38.4kbps
- **Limit (Alarm) or Pulse Relay Output(Optional)** : Potential free, very fast acting relay contact. Configurable as pulse output which can be used to drive an external counter for energy measurement. Configurable as limit (alarm) switch
- **Low back depth** : The instrument has very low back depth (behind the panel) of less than 35 mm
- **User Configurable Features** : User can select any five or ten measurement screens which will be shown on display. Also back light of display can be programmed to switched on or off
- **Parameter Screen recall** : In case of power failure, the instrument memorizes the last displayed screen
- **Run Hour, ON Hour, Number of Interruptions** : Run Hour records the number of hours load is connected. ON Hour is the period for which the auxiliary supply is ON. Number of Interruptions indicates the number of times the Auxiliary Supply was interrupted

## Technical Specifications

<b>Input Voltage</b>		
Nominal input voltage(ACRMS)	Phaseto Neutral	Phase to Phase
	57.7VL-N	100VL-L
	290VL-N	500VL-L
System PTprimaryvalues	100V LL to 1200kVLL programmable onsite.	
Maxcontinuousinputvoltage	120% of nominal value	
<b>Input Current</b>		
Nominalinputcurrent	1A/5A AC RMS	
System CTprimaryvalues	From 1A to 9999A	
Maxcontinuousinputcurrent	120% of nominalvalue	
OverloadIndication	“-OL-”, >121% of Nominal value (for voltage andcurrent)	
<b>Auxiliary Supply</b>		
ExternalHigherAux	60 V – 300V AC/DC (± 5% approx)	
Higher AuxNominalValue	230 V AC/DC 50/60 Hz for ACAux	
ExternalLowerAux	20V – 60 V DC / 20V – 40 VAC	
Lower AuxNominalValue	48 V DC / 24 V AC50/60 Hz for ACAux	
AuxSupplyfrequency	45 to 65 Hzrange	
<b>VA Burden</b>		
Nominalinputvoltageburden	< 0.3 VA approx. perphase	
Nominalinputcurrentburden	< 0.3 VA approx. perphase	
Auxiliary Supplyburden		
WithAdd-oncard	<6VAapprox	
WithoutAdd-oncard	<4VAapprox	
<b>Operating Measuring Ranges</b>		
Current(EnergyMeasurement) (As perIEC62053-21)	Starting current : 2mA for 1A & 10mA for 5A Range: 20mA to 1.2A for1A 100mAto6Afor5A	
Voltage	50... 120% of nominalvalue	
PowerFactor	0.5 Lag....1....0.8Lead	
Frequency	50Hz /60Hz	
TotalHarmonicDistortion	0.....50%	
<b>Accuracy</b>		
ReferenceConditions(As per IEC 62053 -21)	23°C +/- 2°C	
ActiveEnergy	Class 1 as per IEC 62053 –21	
ReactiveEnergy	Class 2 as per IEC 62053 –23	
ApparentEnergy	Class1	
ActivePower	±0.5%ofnominalvalueatcosφ=1	
Re-ActivePower	±0.5%ofnominalvalueatsin φ=1	
ApparentPower	±0.5% of nominalvalue	
PowerFactor/PhaseAngle	±3°	
Voltage	±0.5%ofnominalvalue	
Current	±0.5%ofnominalvalue	
Frequency	± 0.2% of midfrequency	
THD (Voltage/Current)	±2.0%	

<b>Overload Withstand</b>	
Voltage	2x rated value for 1 second, repeated 10 times at 10 second intervals
Current	20x I <sub>max</sub> for 0.5sec
<b>Display update rate</b>	
Response time to step input	1 sec approx.
<b>Applicable standards</b>	
EMC	IEC 61326 - 1 :2005
Immunity	IEC61000-4-3.10V/mmin–Level3 industrial Low level
Safety	IEC 61010-1-2010 , Permanently connected use
IP for water&dust	IEC60529
Pollution degree	2
Installation category:	III
Isolation : Protective Class	2
High Voltage Test	
Input+Aux Vs Surface	4kV RMS, 50Hz, 1min
Input Vs Remaining Circuit	2kV RMS, 50Hz, 1min
<b>Environmental</b>	
Operating temperature	-10 to +55°C
Storage temperature	-20 to +65°C
Relative humidity	0.....90%RH (non condensing)
Warm up time	Minimum 3 minute
Shock (As per IEC60068-2-27)	Half sine wave, Peak acceleration 30gn(300m/s <sup>2</sup> ), duration 18ms.
Vibration	10... 150...10 Hz, 0.15mm amplitude
Number of Sweep cycles	10 per axis
Enclosure	IP 50 (front face only)
<b>Interfaces</b>	
Impulse Led	For Energy Calibration at front
Relay(Optional)	240VAC, 5A (Configured as limit or pulse output)
Modbus(Optional)	RS485, max. 1200m Baud rate : 4.8k, 9.6k, 19.2k, 38.4k bps

Note : Variation due to influence Quantity is 100% of class index for all other parameters except Energy.

Input connections are made directly to screw-type terminals with indirect wire pressure. Numbering is clearly marked on the connector . Choice of cable should meet local regulations. Terminal for both Current and Voltage inputs will accept up to 4mm<sup>2</sup> (12AWG) solid or 2.5 mm<sup>2</sup> standard cable.

Note: It is recommended to use wire with lug for connection with meter.

ENERGY METER FOR DUAL SOURCE APPLICATIONS

# ZAM LC40

## ENERGY METER FOR DUAL SOURCE APPLICATIONS

**ZAM LC40** is a Dual Source Energy Meter which measures important electrical parameters of Electrical supply received from Utility and a back-up source of supply the Diesel Generator in 3 phase and 1 phase network & replaces the need of multiple analog panel meters. It measures electrical parameters like Active / Reactive / Apparent energy and power. The instrument has 2 configurable optional outputs as pulse output for energy measurement or limit output.

## Product Features

- Dual Source Energy Measurement as per IEC 62053:
  - Independent Energy counter for Generator and Utility
  - Generator sense signal (10 to 60VDC/20 to 300VAC) to measure Active energy (kWh), Reactive energy (kVAh), Apparent energy (kVAh) measurement
- THD Measurement : The instrument measures THD per phase voltage & current up to 15th Harmonic.
- On-site programmable:
  - On-site Programmable System Configuration 3PH4W / 3PH3W / 1PH2W.
  - On-site Programmable CT ratios and PT ratios
- Low back depth : The instrument has very low back depth (behind the panel) of less than 35 mm.
- User Configurable Features : User can select any five or ten measurement screens which will be shown on display. Also back lit can be programmed to switched on or off.
- LCD Display with Back lit : LCD shows 3 Parameters at a glance.
- Parameter Screen recall : In case of power failure, the instrument memorizes the last displayed screen.
- Run Hour, ON Hour, Number of Interruptions: Run Hour records the number of hours load is connected. ON Hour is the period for which the auxiliary supply is ON. Number of Interruptions indicates the number of times the Auxiliary Supply was interrupted.
- Limit (Alarm) or Pulse Relay Output (Optional) :
  - Potential free, very fast acting relay contact
  - Configurable as pulse output which can be used to drive an external counter for energy measurement
  - Configurable as limit (alarm) switch
- Direct remote access via MODBUS with programmable baud rates up to 38.4kbps
- On-site selection of Auto scroll / Fixed Screen
- Enclosure Protection for dust and water : Conforms to IP 50 (front face) as per IEC60529
- Compliance to International Safety standards : Compliance to International Safety standard IEC 61010-1- 2010
- EMC Compatibility : Compliance to International standard IEC 61326

## Ordering Information

Ordering information	(✓)
<b>System Type (Connection network)</b>	
3 Phase (programmable as 4 Wire or 3 Wire on site)	
<b>Auxiliary Supply Voltage</b>	
60 - 300 V AC DC	
20 - 60 V DC / 20 - 40 V AC	
<b>Optional</b>	
A I. MODBUS (RS485) output	
II. MODBUS Option not used	
B I. Pulse Output- 1	
II. Pulse output- 2	
III. Pulse Output option not used	

**ZAM LC40** 1 Phase, 20 - 60 V DC / 20 - 40 V AC Auxiliary Supply Voltage, MODBUS (RS485) output, Pulse Output option not used.
