SUMMATION CT

CURRENT TRANSFORMER

SUMMATION CT

CURRENT TRANSFORMER

ZIT SIG75 | ZIT SIG 15

Summation CTs are designed to summarize the different rating of CTs of equal phase relation with any angle of phase difference. They are used to add Secondary Current of different CTs with same secondary CT secondary out i.e all CTs with secondary of 5A in order to measure with one CT only. Then the output current again constitutes a standardize quantity.

Ziegler has range from 5+5 to 5+5+5+5+5+5+5+5/5 range summation CTs with a accuracy of 0.5 and class 1.

Note: When using unequal main CTs then the ratio of lowest primary main CT to highest primary current main CTs should not exceed 1:8

Product Features

- Easy Installation
- Nickel Plated Secondary terminals with marking
- Instrument security factor FS5 and FS10
- IP 20 Terminal Protection with self lifting terminal clamps
- Rated Short Time Thermal Current upto 60 x In.
- Dynamic Short circuit current upto 2.5 x I_{th}
- Secondary Current 5A
- VA rating available from 5VA to 25VA

Specifications

Technical Data	
Accuracy Class	0.5, 1
Rated Burden	5VA - 25VA
Rated Voltage	720V
Rated Frequency	50/60Hz
Rated Primary Current	5+5 to 5+5+5+5+5+5+5+5
Rated Secondary Current	5A
Working Temperature	-25°C to 45°C
High Voltage Test	3KV for 1 mint at 50/60Hz
Insulation Class	E(max 120°C)
Case	Made of non-flammable plastic
Size	75 x 70 x 112 & 150 x 70 x 112
Terminals	M4 Screw for terminals and M5 screw for mounting
Applicable Standards	
General	IEC 61869-1&2 / IEC 60044-1
Safety	IEC 61010-1-2010
IP for water & dust	IEC 60529

SUMMATION CT

CURRENT TRANSFORMER

Guidance for Ordering the Summation CT

Example:

Main Transformer Ratio

500/5A

400/5A

300/5A

Total Current = 1200/5A

Burden – 1 Ammeter

Required Active performance of the Current Transformer.

Ammeter	1.5VA
---------	-------

Measurement Conductor Loss	1.5VA
----------------------------	-------

Consumption in Summation CT	<u>4.0VA</u>
-----------------------------	--------------

Total VA	7.0VA
----------	-------

The Individual Main transformer must provide it's VA Share from this 7.0VA .

Consideration must also be given to the respective power loss between main transformer and the summation transformer including other possible losses.

1. Main Transformer 500/5A $(500/1200) \times 7 = 2.92VA$ + additional Losses
2. Main Transformer 400/5A $(400/1200) \times 7 = 2.33VA$ + additional Losses
3. Main Transformer 300/5A $(300/1200) \times 7 = 1.75VA$ + additional Losses

The VA values of the Main Transformer are to be rounded up to the corresponding values in above mentioned table

Ordering Information

- Class of accuracy : 1 & 0.5
- Rated Primary current inputs : 5+5+5
- Rated ratios of main C.T.'s : As per requirement
- Rated secondary current : 5A
- Rated Burden : 15A
