Single-Phase Direct Connected Energy Meter
ZAM DN1U

Energy Meter

ZAM DN1U

Overview :

ZAM DN1U is a modern Single Phase Direct Connected Energy Meter designed for intended use in residential, commercial and light industrial Electrical Energy Metering. The meter is engineered using advanced microcontroller technology and is suitable for electrical parameter measurement and monitoring in 1 Phase 2 Wire Networks. It supports maximum 45 A current measurement on direct connection. It supports Tariff Counters selectable via MODBUS Communication. It displays parameters on bright LCD and also has Pulse Output and Impulse LED for energy monitoring. It has inbuilt industry standard MODBUS RTU for remote monitoring. Meter housing is standard Din Rail Mount that allows ease of installation.

Product Features :

- **Direct Connection Meter :**
ZAM DN1U can safely measure 45 A maximum current on direct connection, eliminating the use of expensive external CT for high current networks. Meter is also self-powered thus offer simplified connections.
- **Measured Electrical Parameters :**
ZAM DN1U is primarily for bidirectional Active, Reactive and Apparent Energy measurement but it also accurately measures important electrical parameters like TRMS Voltage, TRMS Current, Frequency, Active, Reactive and Apparent Power, and Power Factor in Single Phase Networks. The measured parameters can be viewed on display and MODBUS for remote viewing.
- **Demand :**
The Demand parameter for Active Power (Import/Export), Reactive Power (Import/Export), Apparent Power and Current are calculated as per configurable Demand Integration time.
- **Pulse Outputs :**
ZAM DN1U has one opto-isolated potential free pulse output that can be configured for any one of the Active (Import/Export), Reactive (Import/Export) and Apparent Energy parameter. The pulse width and rate of pulse out is onsite programmable.
- **Impulse LED :**
The meter has Impulse LED which flash at rate of 1000 impulse per 1 kWh indicating the Active Energy consumption.
- **Front Key :**
One key is provided for easy navigation and accessibility of different parameters.
- **Remote Communication :**
ZAM DN1U provides optional communication based on MODBUS protocol for remote data acquisition of measurement data and configuration. MODBUS parameters Baud rate, device address and parity- stop bits are programmable.

- **LCD :**

The LCD has bold seven segment digits with bright white backlit for display of measurement parameters. Measurement screen can be set as automatic scrolling or manual scrolling.

- **Multi Tariff :**

The meter has 2 Tariff Counters selectable via Digital Input or via MODBUS Communication or energy accumulation. Energy for Tariff are System Import Active Energy, System Export Active Energy, System Import Reactive Energy, System Export Reactive Energy, System Apparent Energy and System Total Active Energy.

- **Compliance to Standards :**

National / International standards are complied

Accuracy Standard : EN50470-1, 3
